Forecast for Thursday 11 May 2023

Weather: Some valley mist and patchy hill fog at first on Thursday. Sunny spells will soon develop along with scattered heavy, possibly thundery and slow-moving, showers into the afternoon. These then fading into the evening.

Chance of cloud-free hill tops above 600m: A 30% chance at first, then 80% chance by mid-morning.

Low Cloud and visibility: Occasionally poor visibility at first with valley mist and early low cloud covering summits. Visibility becoming mostly good or excellent, but occasionally poor in heavy or thundery showers. Cloud bases may affect summits around 300-500m at first in the low cloud and then later in the day in any heavier showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

There will be a risk of hail and lightening from late morning until the evening, associated with scattered showers. Otherwise, there will be plenty of sunny spells and therefore sun cream and water are recommended for a day in the hills.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Thu 11 May 2023	1.8mm	2.6mm	17.4mm

Forecast for Friday 12 May 2023

Weather: Early mist and fog patches quickly clearing to leave a dry day with light winds and plenty of pleasantly warm sunny spells developing.

Maximum wind: Northeasterly 5 to 10 mph

Chance of cloud-free hill tops above 600m: 40% chance at first, becoming 90% from mid-morning.

Low Cloud and visibility: Some poor visibility at first, but becoming good or excellent from mid-morning.
